

Together, We Reach the Heights

## ABOUT US

### About Us

Omega Lifts provides services in the sale, supply, and installation of electric elevators, hydraulic lifts, and escalators with its headquartered in the Eastern Province, Dammam. The company has successfully expanded and executed numerous projects, committed to serving all customers with their diverse needs. Additionally, Omega Lifts has equipped highly trained maintenance teams to ensure that all customers' demands are met at the highest level.

# VISION & MISSION

## Our Vision

Throughout our history, we have provided a comprehensive range of elevator products backed by the right technical support for after-sales, prioritizing customer comfort and trust above all.

We stand out by focusing on quality, reliability, design and development, ensuring that at every step we deliver high-quality products across various sectors of electric and hydraulic elevator performance.

## Our Mission

Our mission centers around excellence and striving to reach the highest levels of quality in executing specifications-based projects. We aim to ensure that Omega lift systems remain at the forefront, adhering to the highest standards of safety and quality, and a strict code of ethics. We provide effective solutions that our customers confidently trust to exceed their expectations. We consider our clients as partners and are committed to completing our tasks with integrity, always striving to fulfill our promises by continuously raising your aspirations.

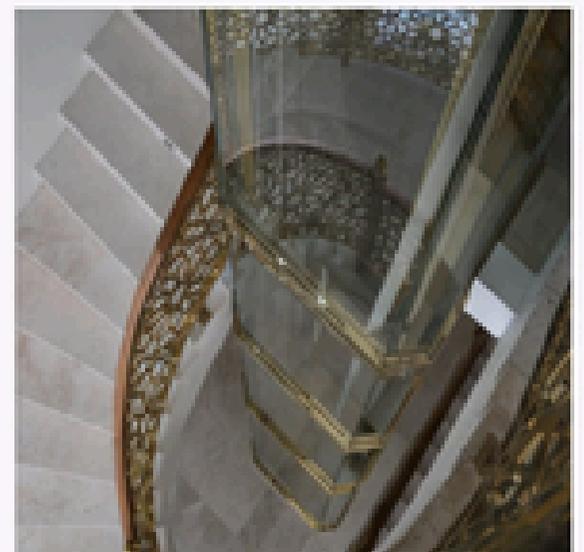

# PITLESS ELEVATORS

Now you can install an elevator without a pit and without a machine room.

Our innovative solutions allow you to install an elevator with minimal structural changes, eliminating the need for a pit or machine room.

Ideal for retrofitting homes, offices, and older buildings, our pitless elevators provide a compact, efficient lift solution for tight spaces within residential and commercial properties.

# TYPES OF OMEGA LIFTS

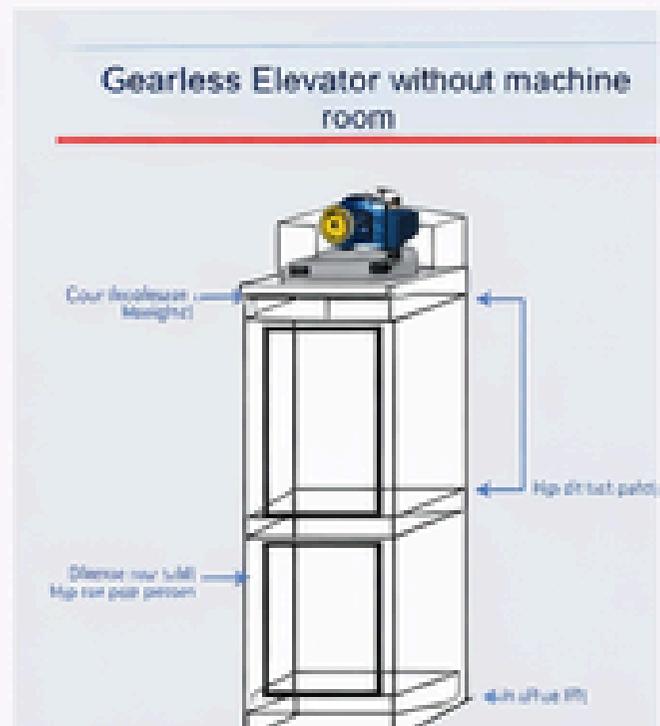

## Geared Elevator with Machine Room

Geared elevator with machine room requires a machine room on the roof and an elevator pit to reduce the temperature of the room to 35 degrees approximately.

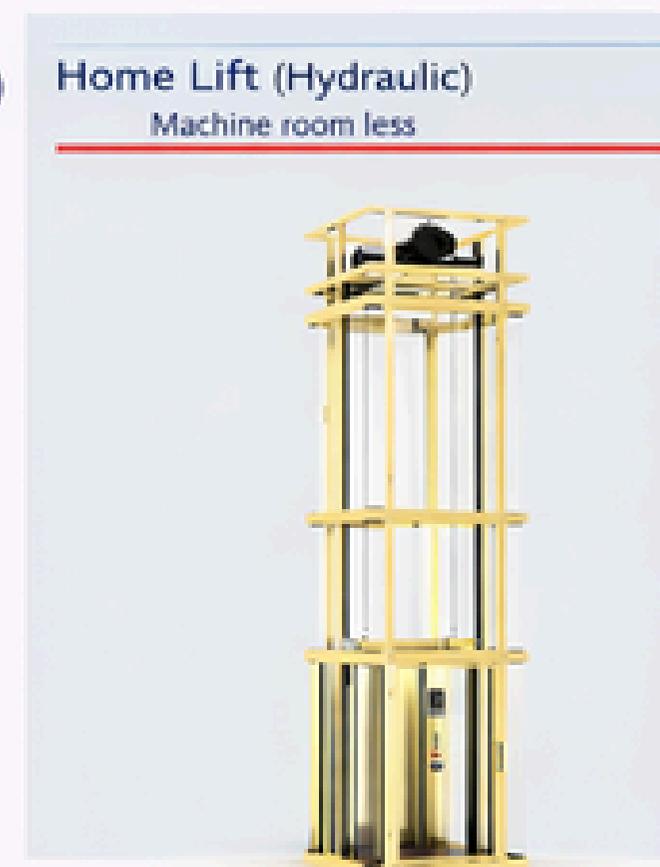

## Gearless Elevator without Machine Room

Gearless elevator without machine room is roof-mounted and uses approximately 35% less electricity.

## Home Lift (Hydraulic) - Machine Room Less)

Home lift (hydraulic - machine room less) can be installed directly on the floor without drilling or grouting.

# ESCALATORS

## Escalators & Moving Walkways

### Keep People Moving!

Our escalators and moving walkways offer safe, efficient, and continuous operation to move people effortlessly in airports, malls, public transit systems, and commercial centers.

Engineered to be both aesthetically pleasing and highly functional, our escalators and moving walkways are designed and built to fit any architectural style, ensuring a seamless integration and reliable performance.

### Elevate Your Space

Experience the latest in escalator and moving walkway technology — providing smooth, quiet and energy-efficient operation.

### Safety Guaranteed

Our escalators and moving walkways comply with EN1115 international safety standards, featuring built-in safety mechanisms such as emergency stop buttons, handrail speed monitors, and anti-slip floor.

### Stay Informed

Our team offers MLS and continuous support, ensuring your escalators and moving walkways remain peak condition. We provide regular inspections, maintenance plans, and timely repairs.

## MAINTENANCE SECTION

### Ready and Professional Around the Clock

Our maintenance section is considered as one of the most vital and important departments at the company as it has a technical team capable of managing all maintenance tasks with the highest level of professionalism. The maintenance section operates around the clock 24 hours a day, 7 days a week to ensure our clients' elevator systems are functioning safely and efficiently.

01

#### Routine Maintenance

Our team provides periodic preventive maintenance services to maintain the elevators at peak performance.

- Scheduled maintenance
- Oil and lubrication check
- Safety component inspection

02

#### Breakdown Maintenance

We respond rapidly to fix and repair any lift breakdown to restore elevators to full working order.

- 24/7 emergency response service
- Rapid troubleshooting and repair

03

#### Modernization and Upgrades

We offer modernization solutions to upgrade and enhance existing elevator systems.

- Upgrading control panels
- Modernizing interior designs
- Installing new safety features

Our team is fully qualified, well-trained, and committed to addressing any technical issues promptly across all regions of Saudi Arabia.

## INSTALLATION DEPARTMENT

---

Our Installation Department includes a dedicated team of experts and engineers who have gained extensive experience from working with major elevator companies in several countries. The Installation Department performs installation with the highest safety standards and ensures that all products meet international specifications.

### SAFETY TESTING

---

We conduct and select all necessary safety devices to protect the users, ensuring that they comply with updated safety codes.

### CUSTOMER VISION ACHIEVEMENT

---

We make sure to meet the customers' vision by delivering elevators that satisfy their needs and aspirations.

We provide the most innovative methods and elegant designs to ensure the highest quality and luxury, from the initial concept and planning to the final installation and finishing processes.

## GLOBAL PARTNERSHIPS

# SAFETY & SECURITY

Our company has been certified by the Saudi Civil Defense Department and engineers as one of the references for approving all elevator company programs in the Kingdom of Saudi Arabia. This reflects our adherence to safety and security requirements as we are dedicated to preserving our customers, equipment, and workplace environment.

Omega Lifts focuses on applying the highest safety and security measures, which includes:

1. Maintain the highest safety and security standards at installation sites.
2. Select and test safety devices regularly after installation.

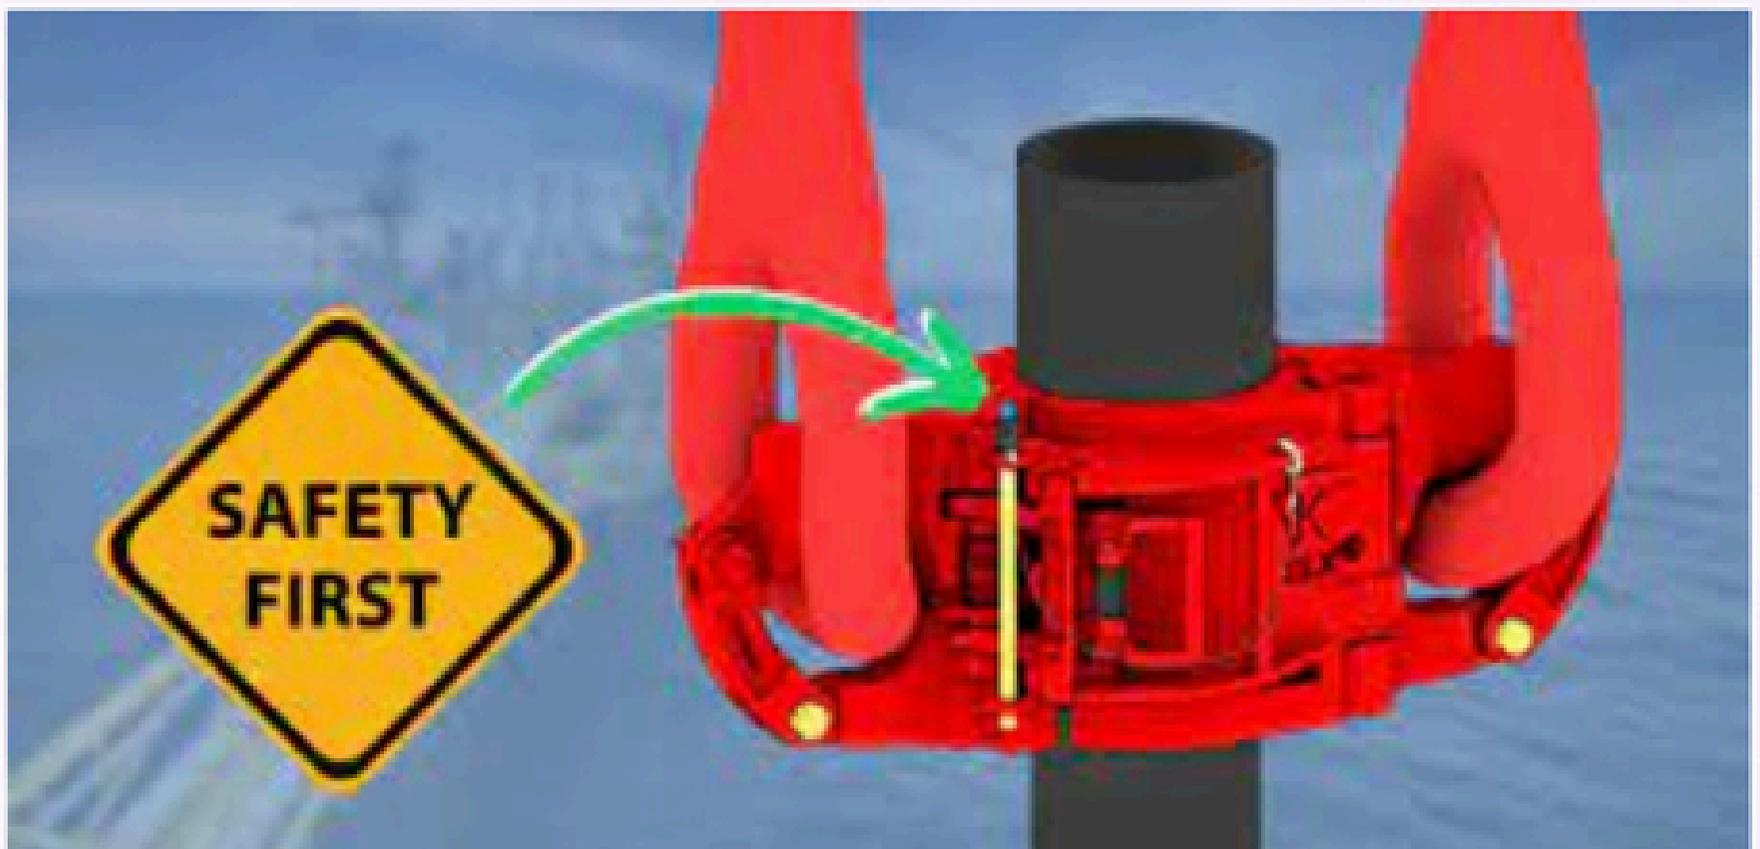

**Safety**

**100%**

## All types of elevators are supplied with safety devices and systems:

1. A complete set of elevator safety components that includes a mechanical safety device and an overspeed governor device, which work as a backup safety set to stop the elevator safely even with unexpected increases in cabin speed.
2. A safety gear device on the cabin that holds the cabin to the rails to lock it at a specific emergency levels.
3. Long curtain light sensors to prevent door closure during entry or exit, ensuring passengers are not trapped between the doors or hit by the elevator door.
4. Temperature sensors which automatically trigger or alert the user when the temperature of the cabin or engine exceeds a specific limit.
5. Fire-resistant cables and safety circuits.
6. Interlock limit switches and overspeed governors to cut off power to the elevator by opening the safety circuit to prevent any malfunction from causing the door trolley to roll off the track.
7. An emergency alarm that alerts the alarm bell to ring when an emergency occurs inside the elevator.
8. The design of the place should be safety-friendly.

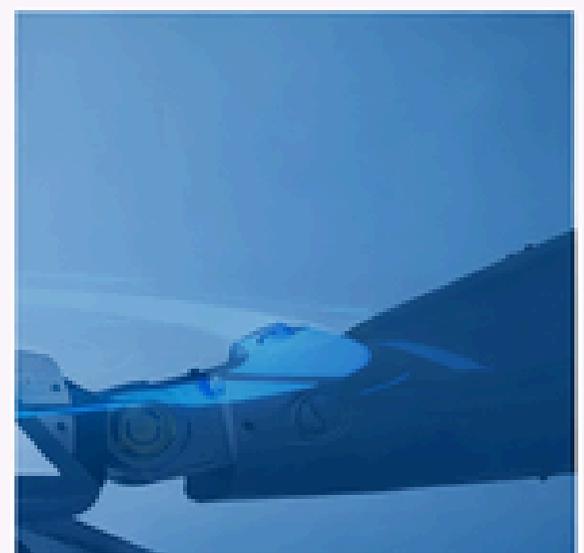

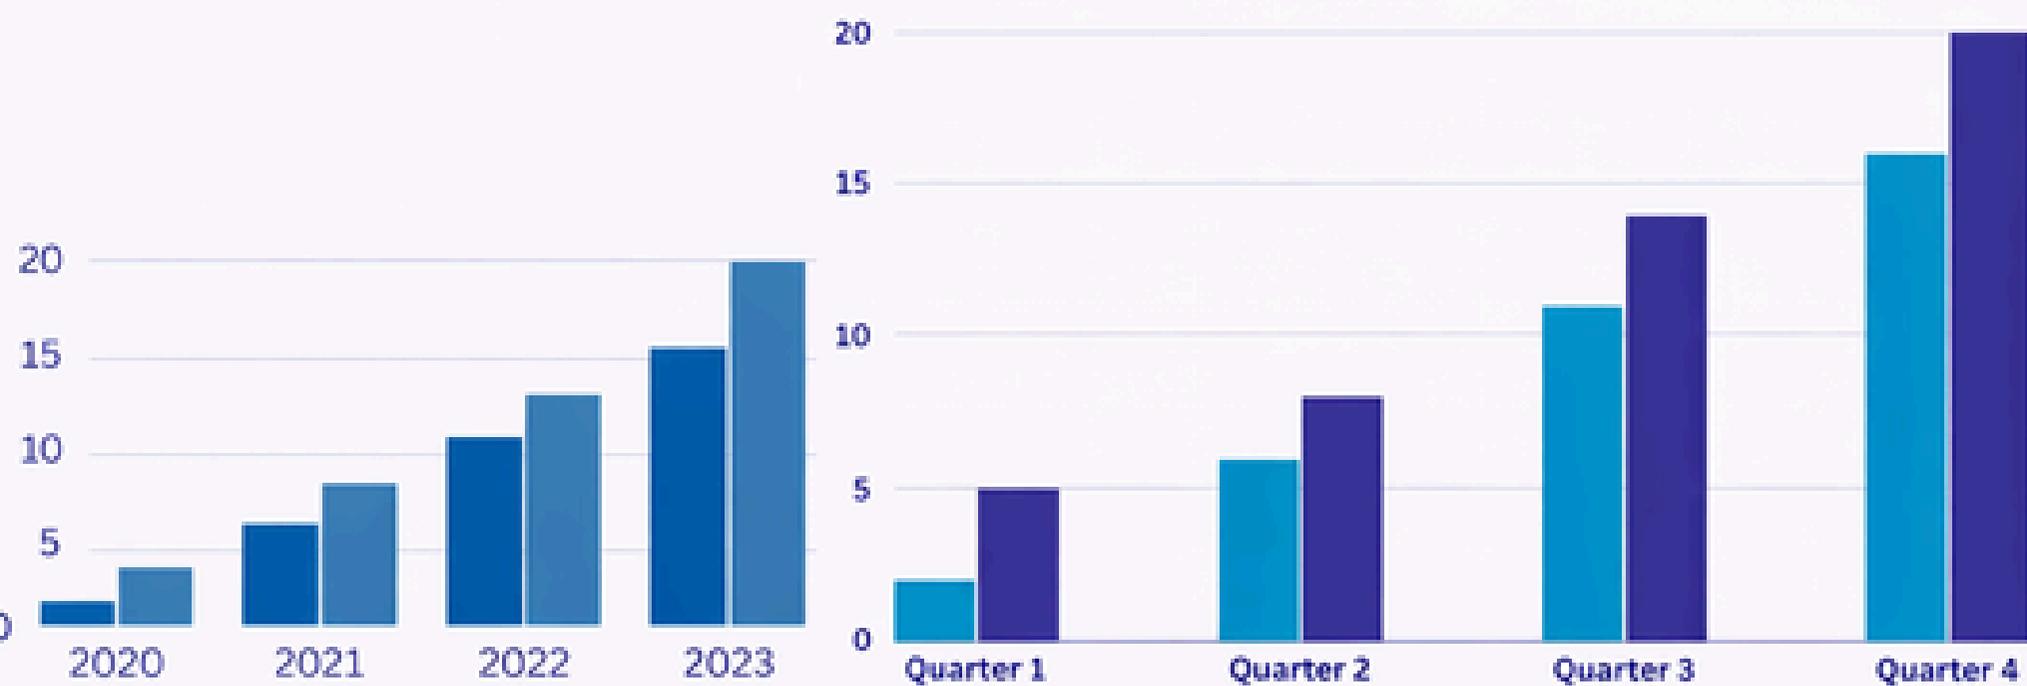

# Sales

Our company is considered one of the largest elevator and escalator suppliers in Saudi Arabia and the Gulf region, with significant experience in this field.

We are committed to providing optimal solutions to satisfy our customers in major developers, shopping malls, hotels, and residential towers by offering state-of-the-art European technology and original spare parts for all our installations.

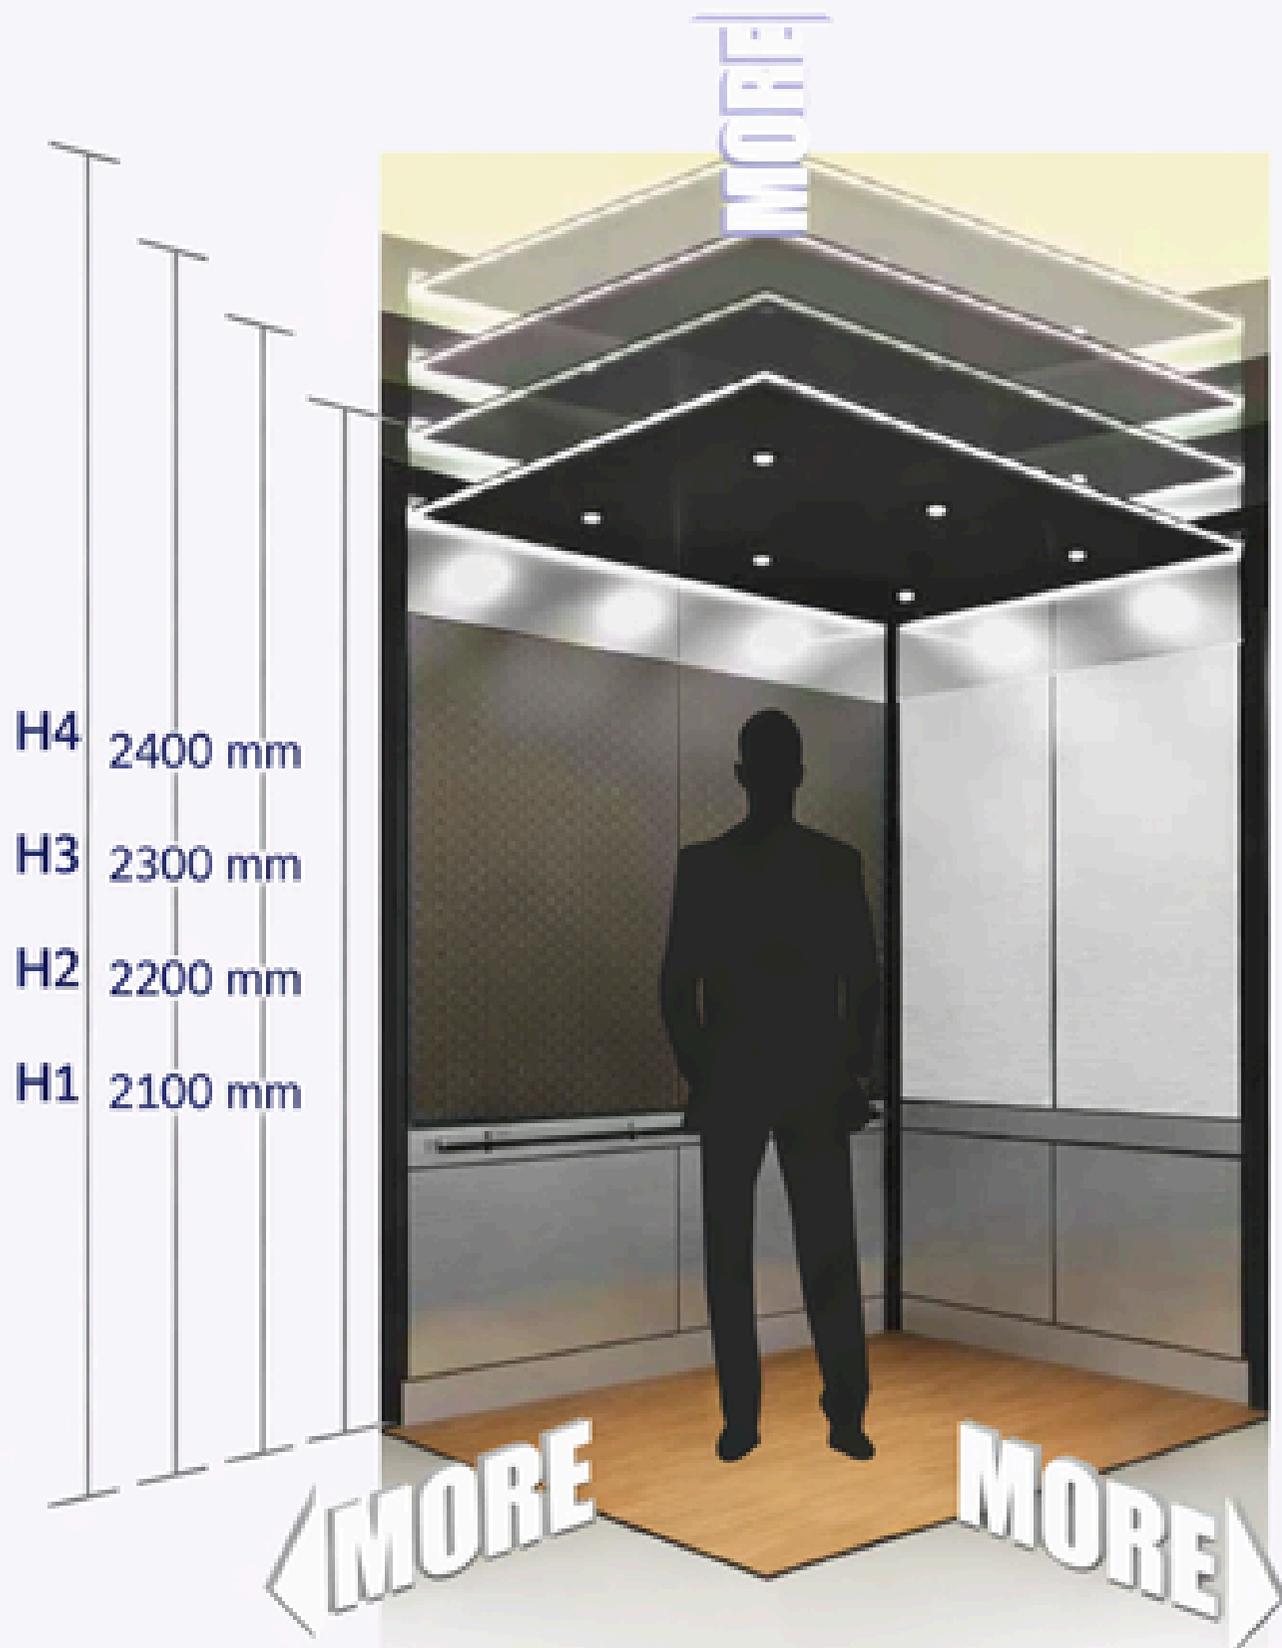

We always aim to be the best choice among elevator companies, and we are dedicated to providing the best services across all our departments, including the Sales and Maintenance divisions.

Additionally, we import all elevator spare parts from original manufacturers with European standards.
